**JOURNAL**

**OFFICE OF LEGISLATIVE COUNSEL**

**Tuesday - 16 May 1961**

2. [redacted] [redacted] OSI, called to say that in connection with its hearings on the Stanford Linear Accelerator project, the Joint Committee on Atomic Energy has indicated to the Atomic Energy Commission that it would be interested in a briefing on what the Soviet Union is doing in this field. Chuck Reichardt, of AEC, asked [redacted] OSI, if we would provide the briefing on this. [redacted] demurred on any appearance in open session and indicated that if AEC or the Committee desired the Agency to brief the Committee in executive session, a formal request should be made to this effect. The matter was taken up with the Acting Chairman of the Commission who indicated a reluctance to ask the Agency to give such a briefing feeling that the Commission could provide whatever information was necessary.

3. [redacted] Delivered to Mr. John Martin, in the office of Senator Henry Dworshak (R., Idaho), the Director's response to the Senator's letter requesting comment on statements made by [redacted] in the subject of the Soviet nuclear powered aircraft program. I briefed Martin verbally on [redacted] indicating that he was well known to us and to others as a fabricator of reports. Martin appreciated this briefing and the Director's reply.
